

## Adjust the Lap Band

### Adjust the Lap Band

Another reason why more individuals choose lap band surgery in their hunt for the correct Weight Loss Surgery is that if need be, the procedure can be reversed. Doctors, however, do not recommend reversing this procedure in most cases.

Patients who choose the lap band as their Weight Loss Surgery will also require adjustments several times following their surgery.

These band adjustments are easily completed doctor's office, and generally take less than half an hour.
